INDEX TO VOLUME XLVIII.

A.

Albumen, solubility of, 184.
Alger, F., formula of Masonite, 218.
on the zinc mines of Franklin, New Jersey, 252.
Alkaline phosphates, neutral, their action upon carbonate of lime, 97.
American Geologists and Naturalists, Association of, sixth meeting, 404.
Ammonia, action of upon butyric ether, 191.
Analysis of the water of the Dead Sea, 10.
of the coprolites of birds, 46.
of the coprolite of an Ichthyosaurus, 60.
of the Alabama meteoric iron, 153
of red oxide of zinc, 261.
of meteoric iron from Cambria, N. Y., 391.
Apjohn, Dr., analysis of water of Dead Sea, 12.
D'Arrest's comet, 403.
Astarte mactracea, a new shell, figured, 276.
Atom, idea of, 352.
Atomic weights, Berzelius's views of Mr. Prout's hypothesis of, 369.
of mercury, copper, and sulphur, 402.

B.

Bailey, J. W., on the crystals found in plants, 17.
on the composition of the marl from Ashley River, S. C., 102.
notice of Ehrenberg's observations on the fossil infusoria of Virginia and Maryland, 201.
on some new localities of fossil and recent infusoria, 321.
Baker, G., on the vibrations of a mercurial pendulum, 156.
Bartels, M., analysis of guano, 60.
Baudrimont, M., on chlorazotic acid, 191.
Berzelius, J., views of Mr. Prout's hypothesis with regard to atomic weights, 369.
Bidard, M., analysis of guano, 181.
Birds, analysis of the coprolites of, 46.
Birds' nests of New Holland, Mr. Owen's opinion of, 61.
Blum, J. R., his treatise on pseudomorphous minerals reviewed, 66.
Bones, fossil, source of fluorine in, 99.
recent and fossil, composition of, 186.
fluorine in, 186.
Boracic ether, 189.
Bradley, F., observations on the southern comet of Dec. 1844, 403.
Bronn, H. G., his General History of Nature noticed, 213.
Butyric acid formed from fibrine, 186.
ether, action of ammonia upon, 191.

C.

Calculus, Differential and Integral, McCartney's, 209.
Canada, geological survey of, 404.
Carex Buckleyi, a new species described, 143.
Caroliniana, 142.
Cooleyi, 144.
Mitchelliana, 140.
miser, 141.
styloflexa, 141.
triceps, 142.
Carty, J., on a new cyanide of gold, 191.
Centerville, Alabama, geology of its vicinity, 399.
Chancel, G., on the action of ammonia upon butyric ether, 191.
Chlorazotic acid, 192.
Chlorine in meteoric iron, 145.
Chrome, sulphate of, 189.
Coals, American, Prof. Johnson's Report on, 394.
Cobalt, oxide of, from Silver Bluff, S. C., 103.
Comet, Faye's, elements of, 219, 402.
De Vico's as corrected, 402.
southern, of Dec. 1844, 402.
D'Arrest's, elements of, 403.
Copper, binoxide of, its reduction by heat, 184.
hydride of, 185.
atomic weight of, 402.
Coprolite of an Ichthyosaurus, analysis of, 60.
Coprolites of birds, analysis of, 46.
Crania, ancient Egyptian, observations upon, 268.
Crocodile, fossil, description of the head of, 265.
Crocodilus clavirostris, described, 265.
Crystals in the tissues of plants, 17.
Currents, polar, their westerly tendencies and influence on the Gulf Stream, 381.
Cyclora minuta, a new fossil shell, 294.

D.

Dana, J. D., review of Dr. Blum's treatise on pseudomorphous minerals, 66.
observations on mineral pseudomorphism, 81.
note on pseudomorphism, 397.
Dana, S. L., analysis of the coprolites of birds, 46.
Daubeny, C., on the constitution of mineral waters, 10.
on fluorine in recent bones, 186.
Dead Sea, analyses of its waters, 10, 12.
Deane, J., on fossil footprints in the new red sandstone of the Connecticut valley, 158.
Dewey, C., on caricography, 140.
Dinornis, Mr. Owen's monograph upon, reviewed, 194.

Doondoo, an Australian bird, 196.
Dove's law of storms, Dr. Hare's correction of an error in his strictures upon, 220.
Downing, A. J., Treatise on Landscape Gardening, 214.
Draper, J. W., Treatise on the Organization of Plants, 214.
Drift ice and currents of the North Atlantic, 373.

E.

Ebelman, M., on boracic ether, 189.
Edrington, E. G., on an intermittent spring near Pittsburg, Pa., 400.
Egyptian crania, ancient, observations on, 268.
Ehrenberg's observations on the fossil infusoria of Virginia and Maryland, 201.
Electrography, its applications to printing, 221.
Ellsworth, H. L., Report on Patents noticed, 392.
Emmons, E., his Taconic System noticed, 394.
Quarterly Journal of Agriculture and Science, 394.
Erdmann, M., on the atomic weights of mercury, copper, and sulphur, 402.
Ether, boracic, 189.
butyric, action of ammonia upon, 191.
Exponential and logarithmic theorems, 36.

F.

Faraday, M., speculation on electric conduction and the nature of matter, Dr. Hare's strictures on, 247.
Favre, P. A., on the equivalent of zinc, 187.
Faye's comet, elements of, 219.
erroneously so named, 402.
Fibrine changed to butyric acid, 186.
Fibrolite and Sillimanite, identity of, 176.
Figuier, L., on the transformation of fibrine to butyric acid, 186.
on salts of gold, 192.
Fluorine in fossil bones, source of, 99.
in recent bones, 186.
Fossil bones, source of fluorine in, 98.
composition of, 186.
Fossil crocodile, description of the head of, 265.
Fossil footmarks, 62.
of the Connecticut valley, 158.
in Westmoreland County, Pa., 217, 343.
Fossil infusoria, new localities of, 321.
Fossil microscopic shells found in marl slate, 292.
Fourcroy and Vauquelin, MM., analysis of guano, 60.
Francis, W., analysis of guano, 182.
Fremy, E., on obtaining osmium and iridium pure, 185.
on some new alkaline salts, 194.
Fusus Trumbulli, a new shell, figured, 285.

G.

Galvanography, Von Kobell's researches in, 221.
Gay Lussac, M., analysis of water of the Dead Sea, 12.
Gibbon, J. H., on the gold of North Carolina, 398.
Girardin, M., analysis of guano, 181.
Gmelin, Prof., analysis of water of the Dead Sea, 12.
Gold, new cyanide of, 191.
salts of, 192.
of North Carolina, 398.
Gray, A., bibliographical notices, 204.
Guano, analyses of, 60, 181.
fossil infusoria in, 338.
Gulf Stream, influence of polar ice-currents upon, 381.
Guy, W., Principles of Forensic Medicine, 215.

H.

Hall, J., on microscopic shells found in marl slate, 292.
Hare, R., correction of an error in his strictures on Dove's law of storms, 220.
on a recent speculation of Faraday on electrical conduction and the nature of matter, 247.
Hatfield, R. G., American House Carpenter noticed, 215.
Hayes, A. A., on the Alabama meteoric iron, 147.
analysis of red oxide of zinc, 261.
Heintz, M., on saccharic acid, 193.
Helices, their habits, &c., 93.
Helix Trumbulli, a new shell, described, 280.
Henry, J., experiments with soap bubbles, 215.
Herrick, E. C., on shooting stars of August, 1844, 316.
Heulandite, its identity with Lincolnite, 64, 175, 180.
Hildreth, S. P., meteorological journal at Marietta, Ohio, for 1844, 287.
Hitchcock, E., on fossil footmarks, 62.
on the identity of Lincolnite with Heulandite, 63.
review of Mr. Owen's monograph on Dinornis, 194.
Hooker, J. D., Botany of the Antarctic Voyage of the ships Erebus and Terror, 204.
Hooker, W. J., Species Filicum, 205.
Hubbard, J. S., elements of southern comet of Dec. 1844, 403.
Hydrogen and phosphorus, combinations of, 184.

I.

Ice-drift and currents of the north Atlantic, 373.
Ichthyosaurus, analysis of the coprolite of, 60.
Infusoria, fossil, of Virginia and Maryland, 201.
and recent, new localities of, 321.
Intermittent spring, 400.
Iridium, method of obtaining it pure, 185.
Iron, meteoric, from Alabama, analysis of, 145.
from Cambria, N. Y., notice of, 388.
salts of, solubility of metals in, 190.

J.

Jackson, C. T., on the Alabama meteoric iron, 145.
Final Report on the Geology of New Hampshire noticed, 393.
announcement of school of chemistry, 403.
Jeffrys, J., on the solution of silica, 397.
Johnson, W. R., Report on American Coals noticed, 394.
Johnston, J. F. W., analysis of guano, 60.
works on agricultural chemistry, 212.
edition of Mülder's Chemistry, 213.
Jordan valley, topography of, 7.

K.

Kendall, E. O., elements of southern comet of Dec. 1844, 403.
King, A. T., on fossil footmarks in Westmoreland County, Pa., 217, 343.
Klaproth, M., analysis of guano, 60.
Klaus, Prof., on Ruthenium, a new metal, 401.
Kobell, Prof. von, upon galvanography, 221.
Kopp, E., on the sulphate of chrome, 189.

L.

Lederite, its identity with sphene, 176, 180.
Lettsom, W. G., translation of Von Kobell's treatise upon galvanography, 221.
Lincolnite, identity of with Heulandite, 64, 175, 180.
Linsley, J. H., catalogue of the shells of Connecticut, 271.
Lithia, a blowpipe test when mixed with soda, 193.
Logarithmic and exponential theorems, 36.
Tables, Shortrede's, noticed, 208.
Lyceum of Natural History of New York, 404.
Lymnæa Linsleyi, a shell, described, 282.

M.

Magnetical Investigations, Dr. Scoresby's, noticed, 33.
Magneto-electric machine, new, 392.
Magnets, musical tones produced by, 401.
Manganese, separation of zinc from, 187.
Mantell, G. A., his Medals of Creation reviewed, 105.
Maout's Leçons Elementaires de Botanique, 206.
Marcet, Dr., analysis of water of Dead Sea, 12.
Marchand, M., on the atomic weights of mercury, copper, and sulphur, 402.
Marl from Ashley River, S. C., composition of, 101.
slate, microscopic shells found in, 292.
fossil infusoria in, 339.
Martius, C. F. P., Systema Materiæ Medicæ Vegetabilis Brasiliensis, 207.
Masonite, formula of, 218.
May, O. W., letter respecting meteoric iron from Cambria, N. Y., 388.
McCartney, W., Differential and Integral Calculus, 209.
Melsens, M., on the preparation of sulphacetic acid, 193.
Mercury, atomic weight of, 402.
Meteoric iron from Alabama, description and analyses of, 145.
from Cambria, N. Y., notice of, 388.
period of August, 1844, 316.
Meteorological journal at Marietta, Ohio, for 1844, 287.
Microceras inornatus, a new fossil shell, 294.
Microlite and pyrochlore, their identity, 177, 396.
Middleton, J., on the composition of recent and fossil bones, 186.
Minerals, pseudomorphous, Dr. Blum's treatise on, reviewed, 66.
Mr. Dana's views upon, 81.
Mollusks, catalogue of, near Richmond, Indiana, 93.
Morton, S. G., description of the head of a fossil crocodile, 265.
observations on ancient Egyptian crania, 268.
Mülder, G. T., Chemistry of Animal and Vegetable Physiology, announced, 213.
Musical tones produced by magnets, 401.

N.

Napier, J., on the solubility of metals in the salts of iron, 190.
Natural History of Creation, Vestiges of, noticed, 395.
Nautilus Connecticutensis, a new shell, figured, 286.
New York Geological Reports reviewed, 210, 296.
Niobium, a new metal, 400.
Nucula fabula, a fossil shell, 295.
obliqua, a new fossil shell, 294.

O.

Olmsted, D., new experiments on the solar spectrum, 137.
Ornithichnites Culbertsonii, 345.
gallinuloides, 344.
Orthis costata, a new fossil shell, 295.
Osmium, means of obtaining pure, 185.
Otto, M., on the separation of zinc from manganese, 187.
Owen, D. D., review of the New York geological reports, 296.
Owen, R., on the birds' nests of New Holland, 61.
his monograph on Dinornis reviewed, 194.

P.

Page, C. G., new magneto-electric machine, 392.
on musical tones produced by magnets, 401.
Palestine, geological features of, 1.
Peligot, M., on the composition of tea, 187.
Pelopium, a new metal, 400.
Pendulum, mercurial, its vibrations how obstructed, 156.
Phillips, W., mineralogical collection sold, 219.
Phosphates, neutral alkaline, their action upon carbonate of lime, 97.

Phosphorus and hydrogen, compounds of, 184.
Plants, crystals in their tissues, 17.
Plummer, J. T., scraps in natural history, 93.
Polythalamia, fossil, in the marl from Ashley River, S. C., 102.
of the United States, 340.
Poumarede, J. A., on a new series of double salts, 190.
Prime, A. J., Quarterly Journal of Agriculture and Science, 394.
Prout, Mr., hypothesis of atomic weights, Berzelius's views of, 369.
Pseudomorphism, Mr. Dana's note on, 307.
Pseudomorphous minerals, Dr. Blum's treatise on, reviewed, 66.
Mr. Dana's observations on, 81.
Pyrochlore and Microlite, their identity, 177, 396.

R.

Redfield, W. C., on the drift ice and currents of the north Atlantic, 373.
Rose, H., on the new metals Niobium and Pelopium, 400.
Rumker, M., elements of D'Arrest's comet, 403.
Ruthenium, a new metal, 401.

S.

Saccharic acid, preparation of, 193.
Salts, double, new series of, 190.
Scoresby, W., his Magnetical Investigations noticed, 33.
Shells near Richmond, Indiana, 93.
of Connecticut, catalogue of, 271.
microscopic, found in marl slate, 292.
Shepard, C. U., reply to a review of his Mineralogy, 168.
mineralogical notices, 175.
Shepherd, F., experiments on the solar spectrum, 137.
Sherwood, J. D., on the geology of Palestine, 1.
Shooting stars of August, 1844, 316.
Shortrede, R., his Logarithmic Tables noticed, 208.
Silica, solution of, 397.
Silliman, B. sen., review of Dr. Mantell's Medals of Creation, 105.
Silliman, B. jun., analysis of the water of the Dead Sea, 10.
rejoinder to Prof. Shepard, 179.
on meteoric iron from Cambria, N. Y., 388.
Sillimanite and Fibrolite, identity of, 176.
non-existence of zirconia in, 219.
Smith, J. D., analyses of guano, 183.
Smith, J. L., on neutral alkaline phosphates, 97.
on the sources of fluorine in fossil bones, 99.
on the marl from Ashley River, S. C., 101.
on the oxide of cobalt from Silver Bluff, S. C., 103.
abstracts of the researches of European chemists, 181.
Snails, habits of, 93.
Soap bubbles, Prof. Henry's experiments with, 215.
Spectrum, solar, new experiments upon, 137.
Spheropezium leptodactylum, a fossil footprint, 345.
ovoidactylum, 347.
pachydactylum, 346.
thærodactylum, 346.
Spring, intermittent, 400.
Stars, shooting, of August, 1844, 316.
Stein, W., on lithia as a blowpipe test when mixed with soda, 193.
Strong, T., on the exponential and logarithmic theorems, 36.
Sulphacetic acid, preparation of, 193.
Sulphur, atomic weight of, 402.

T.

Taconic system, Emmons's, 394.
Tea, composition of, 187.
Teas, green, adulteration of, 188.
Tenorite, a mineral species, 219.
Teschemacher, E. F., analysis of guano, 181.
Teschemacher, J. E., on the identity of Lincolnite with Heulandite, 65.
remarks on uranium and pyrochlore, 395.
Thenard, P., on the combinations of phosphorus and hydrogen, 184.
Thomson, J. B., Elements of Geometry noticed, 210.
Thomson, T., on the non-existence of zirconia in Sillimanite, 219.
Turbo parvulus, a fossil shell, 294.

U.

United States exploring expedition, narrative of, 211.
Uranite, priority of its discovery at Chesterfield, Mass., 179, 395.
Ure, Dr., analysis of guano, 60.

V.

Vauquelin and Fourcroy, MM., analysis of guano, 60.
Vermont, geological survey of, 404.
De Vico's comet, 402.
Vœlkel, M., analysis of guano, 60.

W.

Warrengton, R., on the adulteration of the green teas of commerce, 188.
Water of the Dead Sea, analyses of, 10, 12.
Whelpley, J. D., on the idea of an atom, 352.
Wilkes, C., narrative of the U. S. exploring expedition, 211.
Williams, S. R., on the shooting stars of August, 1844, 320.
Wurtz, A., on the solubility of albumen, 184.
on the hydride of copper, 185.

Z.

Zinc, equivalent of, 187.
separation of from manganese, 187.
mines of Franklin, New Jersey, 252.
red oxide, analysis of, 261.
